Annual Report 1999

Fire Losses in Canada

The 1999 "Fire Losses in Canada" Annual Report is prepared by the Occupational Safety and Health and Fire Prevention Division, Human Resources Development Canada and is published by the Council of Canadian Fire Marshals and Fire Commissioners. Copies may be purchased at a cost of \$10.00 each (taxes included) from the Council. See order form at back of report.

Prepared: June, 2002

PREFACE

The Council of Canadian Fire Marshals and Fire Commissioners (CCFM/FC) is a national organization through which issues relating to fire prevention can be discussed constructively in an atmosphere of mutual respect, cooperation and understanding. Its primary objective is to advise on and promote legislation, policies, and procedures pertinent to fire protection; participate in the development of codes and standards relating to fire safety; promote fire safety awareness; support the professional development of the Canadian fire service; identify trends relative to the causes and the severity of fire; provide advice to Accredited Agencies involved in the certification and testing of fire protection equipment and materials relating to fire safety and provide a forum for the exchange of information on fire safety matters.

The 1999 Annual Report of Fire Losses in Canada is the seventy-eighth edition to be published. It is prepared by the Occupational Safety and Health and Fire Prevention Division of Human Resources Development Canada, pursuant to federal government fire protection policy, and it is compiled from information supplied by the Council of Canadian Fire Marshals and Fire Commissioners (CCFM & FC), Indian and Northern Affairs Canada (INAC) and Statistics Canada.

Sincerely,

W.P. Worona
Director
Occupational Safety and Health
and Fire Prevention Division
Human Resources Development Canada

SUMMARY

In 1999, a total of 55 169 fires were reported; 388 fire deaths; 2 287 fire injuries; and a total of \$1 231 936 723 in property losses.

The "Residential Property" classification continues to account for the largest number of fires. In 1999, there were 22 150 fires in this category, 40% of the Canadian total. These incidents resulted in 284 deaths or approximately 73% of the nation's fire fatalities. The monetary loss amounted to \$517 million, which is 42% of the total loss.

The property classification showing the second largest number of fires is "Special Properties," where 20 381 fires were reported, accounting for approximately 37% of the overall Canadian total. Under "Special Properties" ground transport vehicle accounted for 13 017 incidents of all fires within this property classification, amounting to a dollar loss of \$88 million. The total dollar loss for the "Special Properties" classification is \$140 million.

In the category "Source of Ignition" the following three groups (not including miscellaneous and undetermined) lead the list of number of reported fires and property dollar loss: "Smoker's Material and Open Flame" with 11 081 and a dollar loss of \$166 238 816, "Cooking Equipment" with 6 143 incidents and a loss of \$76 million, and "Heating Equipment" with 4 857 incidents and a loss of \$86 million.

Table 7 provides a review of the fire data identified under the heading of "Act or Omission." As in the past, the category of "Mechanical, Electrical Failure and Malfunction" had the greatest number of recorded fires, that being 11 757. The 1999 dollar loss for this category is \$279 million. "Arson or Other Set Fires" accounted for 10 170 incidents with a dollar loss of \$221 990 022.

In summary, "Residential Properties" remains an area of utmost concern, accounting for 73% of the total number of fire deaths, 40% of the total number of fires, and 42% of the total dollar loss. The large number of electrical incidents and the associated dollar loss, as well as the number of "Arson or Other Set Fires" and the associated dollar loss, are two other areas of major concern within the Fire Services. A continued effort by all fire protection authorities as well as the public is most imperative in order to reduce the loss of lives, number of fires and property damage.
